

ONLINE STORE • LUMORACHEMICALS.COM

How to order

Browse, quote and buy OLED and OPV materials online.

Every listing carries the **CAS number, purity and product code**, so you can confirm you have the right compound before you order. Choose your pack size and grade, add to cart or request a quotation, and check out. **No account is required to start.**

Six steps from search to delivery

1

Find the material

Browse by category or search by name or CAS.

2

Check the listing

CAS, purity and product code on every page.

3

Pack and grade

mg, g or kg. Sublimed or synthesis grade.

4

Cart or quotation

Buy now, or request a personalised quotation.

5

We confirm

Stock, lead time and documentation confirmed.

6

Ship and track

CoA with the lot. Ask LUMI for tracking.

Ordering notes

- ✓ **Not in the catalogue?** Ask for custom synthesis. Share the structure and specification and we will scope it.
- ✓ **Need a formal quotation for procurement?** Start a quotation in LUMI and it arrives by email in a form you can process.
- ✓ **Larger quantities.** Kilogram and production volumes are quoted individually rather than priced online.
- ✓ **Purity grades.** Synthesis grade for route development, sublimed grade for device work. Ask if you are unsure which you need.
- ✓ **Documentation.** A Certificate of Analysis is supplied with every lot. Tell us at order stage if you need additional documents.

The fastest route is LUMI. Type the material, the quantity and the purity you need into the assistant on the site and it will find the product, confirm the specification and start the quotation in one conversation.
